FAQs
Commercial Real Estate

Have questions about working with Panduit? We answer some of our most common questions from Commercial Real Estate companies here. **Don't see your question answered here?** Please reach out to your Panduit rep for more answers!

Q Who is Panduit?

A Panduit is a global company that provides electrical and network infrastructure solutions for businesses. Recognized as one of the world's leaders in copper and fiber cabling systems, we are continually innovating in our development of infrastructure products, including data center cabinets, telecommunications racks, cable ties, grounding systems, identification and labeling systems, installation tools, and more.

Q What commercial real estate segments does Panduit support?

A Panduit's innovative network connectivity products and solutions can be applied to core commercial real estate segments including office, industrial, hospitality, retail, multifamily, and data center.

Q What type of projects do you support?

A As you know, there is no "one size fits all" project when it comes to commercial real estate. Panduit can customize solutions to meet your evolving project requirements for new construction, facility expansions, renovations, and relocations.

Q Where can I find Panduit solutions?

A Panduit operates around the world with a global network of warehouses and distributors, enabling seamless scalability of projects. Additionally, Panduit has certified installers in all corners of the world, to work with you in designing and installing your infrastructure.

Q Why should I partner with Panduit on my next commercial real estate project?

A Partnering with Panduit gives you access to the broadest portfolio of innovative network infrastructure and AV solutions on the market. These solutions help you provide reliable, consistent network performance and increase speed to market.
