

Pre-Configured Micro Data Centers (MDC)

Quickly and reliably deploy rack mount equipment while protecting the critical physical media that makes up the industrial network.

MDC Rear View Installation Example

NEMA MDC Rear View Installation Example

- Includes copper/fiber connectivity, cable management, grounding
- Dynamic cabinet features ensure safe transport of IT equipment under typical shipping conditions
- Simplifies and speeds deployment
- Enables easy, repeatable integrations
- Provides flexibility with 24 and 42 RU options
- Aligns with TIA-1005 Industrial Network Standards
- NEMA 12 MDC is rated to protect against dust, dirt, and dripping non-corrosive liquids, oil and lubricants

NEMA MDC is excluded from the Dynamic feature as well as the 24 RU option
